## About .NET Conf x Seoul

.NET Conf Seoul is an annual technical conference for .NET developers in South Korea, hosted by the non-profit organization .NET Dev every January.

This event aims to introduce the latest .NET technologies announced by Microsoft each fall, and serves as a platform for developers using .NET technologies in various industries across South Korea, as well as for anyone interested in .NET, to gather and share information and experiences.

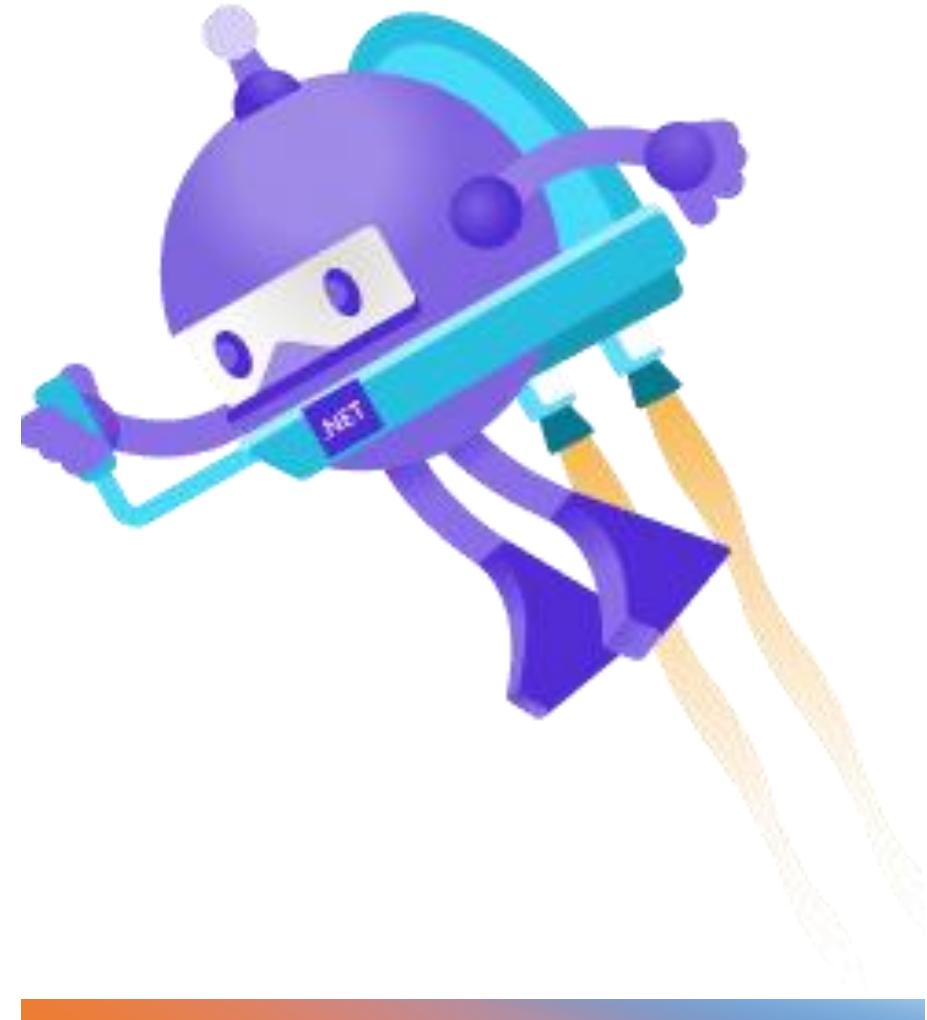

# **.NET Conf Seoul, The Festival Of .NET Heroes**

.NET Conf Seoul aims to be the "conference for the most passionate .NET users in Korea."

All of us who have sincerity and passion for .NET are contributing to making a better world as wonderful ".NET Heroes."

This event is a joint event of .NET Conf (<https://www.dotnetconf.net>), a global event that connects .NET developers not only in Seoul, Korea but also around the world.

We are creating a place to talk about the development and future of .NET technology and dream of a better technology environment.

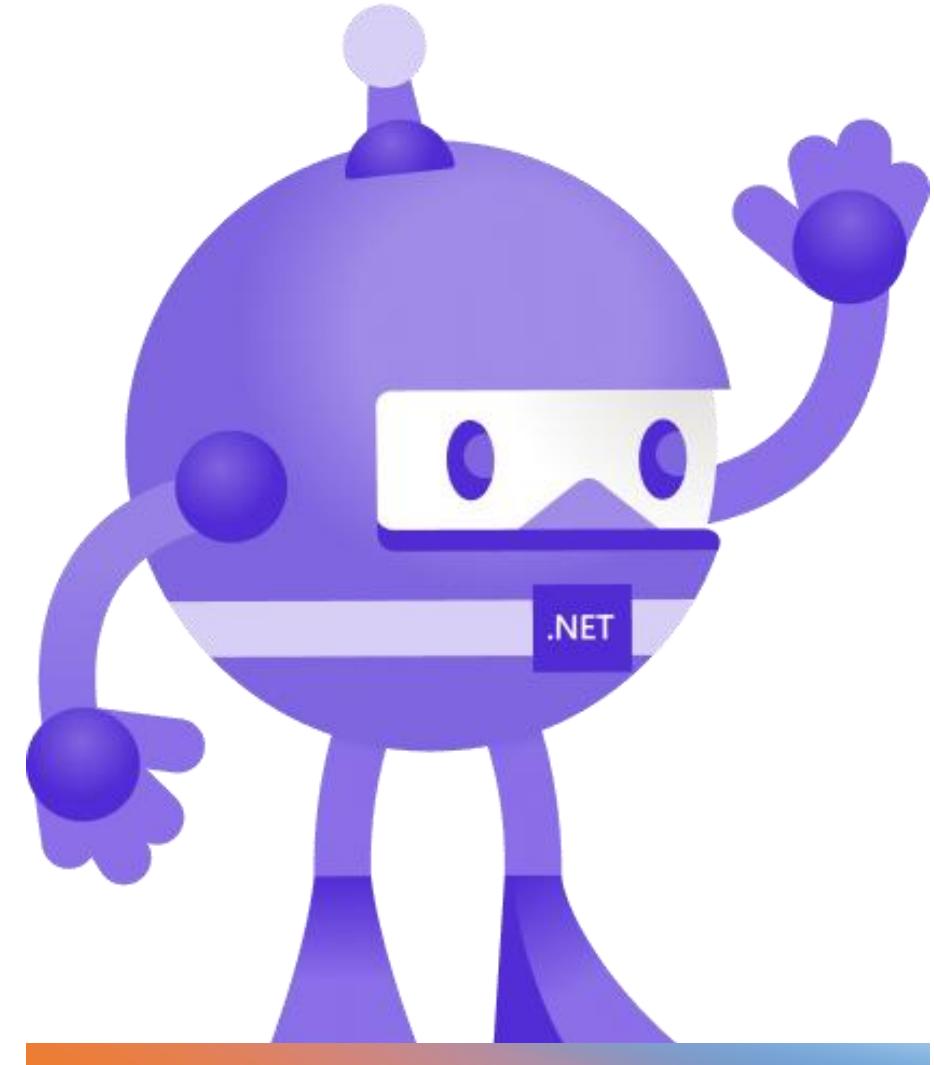

# **.NET Conf Seoul, A Non-Profit Event Open To Everyone**

.NET is a technology that Microsoft provides as open source every year, and although the act of releasing .NET itself is connected to commercial activities, the technology itself is released for free.

In contrast, .NET Conf Seoul is a completely non-profit event, hosted by .NET Dev, a non-profit organization run by individuals who love .NET technology and are passionate about spreading .NET technology.

The profits generated from the event do not contribute to the operating profits of Microsoft branches, headquarters, or Microsoft partners in Korea or abroad, and sponsors do not receive any distribution of event profits.

All profits are reinvested only in preparation for the next event and in the operating expenses of the organization.

17:00 ~ 17:30	Prize Draw and Closing

# Why You Should Support .NET Conf Seoul?

.NET Conf Seoul is a non-profit event, and the organizing committee is comprised of volunteers, and the event is prepared without any financial compensation. Therefore, .NET Conf Seoul relies on the support and donations of sponsors to operate.

Participating in this event as a sponsor will not only help achieve the event's goals, but will also strengthen branding for domestic software developers, enhance the effect of promoting the company, products, and services, and will also be beneficial for securing potential customers and recruiting developers and engineers.

## Why You Should Support .NET Conf Seoul? (Cont.)

Through this event, we hope to expand the activities of domestic .NET developers, strengthen the network by cooperating with local developer communities, and provide a venue for communication with more diverse people.

We believe that the growth of the community leads to the growth of companies, developers, and industry professionals.

# Sponsor Registration Procedure

1. After reviewing the contents of this sponsor guide, select the sponsorship level that fits your company or organization budget.
2. Please register your inquiry through the online application form or submit a sponsorship application directly.
3. If there are any remaining quantities, a representative from the operating committee will contact you.
4. We will proceed with the sponsorship payment process by confirming the issuance of invoice documents and the sponsorship payment method. Prepayment before the event is the default.
5. Once the sponsorship is confirmed, the prepayment of the sponsorship amount suggested for each level will be made.

# Sponsor Benefits

## You can meet potential customers.

You can get a chance to get your products or services related to .NET technology better known by sponsoring a conference.

## You can expand your hiring opportunities for engineers and developers.

If you are an engineer or developer interested in .NET technology, you may be a rare engineer or developer who deals with technologies that are not common in the market.

You can increase your chances of hiring high-quality talent by sponsoring a conference.

## You can uncover sales opportunities.

You can identify and uncover sales opportunities by working with developers as well as various industry stakeholders.

# Sponsorship Program Details

\*If a corporation outside of Korea remits money in USD, it is not subject to VAT. If the event is canceled due to the organizer's circumstances, a full refund including tax will be issued. (However, if the cancellation is due to natural disaster or natural calamity, no refund will be issued.)

\*\*Only available to participants who have agreed to provide third-party information and receive marketing emails when registering for attendance

\*\*\*Permission to provide free amenities at the check-in desk

\*\*\*\*Individual/organization/group sponsorship is available. After making a one-time sponsorship payment through GitHub Sponsorship, verify your ID, be listed on the sponsor list, and receive a free ticket.
